

### SHORE D DUROMETER:

- To measure the Shore D scale hardness of specimens and articles of hard rubber and its derivatives, according to UNE EN ISO 868, ISO 48-9, ISO 7619, DIN 53505 AND ASTM D 2240-15. Used in the following types of materials: Hard thermoplastic, hard rubber and plastic high hardness, plexiglass, polystyrene, sheet vinyl, cellulose acetate, thermostatic and laminated formica, etc.

### TECHNICAL SPECIFICATIONS:

code: 53505/D-U

- Reading: 1 shore unit.
- Measuring range: 0-100 shore units.
- To measure the Shore D scale hardness of specimens and articles of hard rubber and its derivatives, according to DIN 53,505, UNE-EN ISO 868 and ASTM D-2240. Used in the following types of materials: Hard thermoplastic, hard rubber and plastic high hardness, plexiglass, polystyrene, sheet vinyl, cellulose acetate, thermostatic and laminated formica, etc.
- 60 shore test probe included.
- Wooden case included.
- Dimensions: 65 x 60 x 27 mm.
- Weight: 200 g.
